How to read these numbers

We lead with the median rather than the average, because a handful of very large buildings pulls the average above what you will actually meet. Per-square-metre figures are worked out building by building and then averaged, not by dividing total price by total floor area. Shares in the tables are out of the listings that have that field filled in, not out of every listing. The numbers follow the live inventory — this page is recalculated on every visit.
